The purpose of the Medical Education Speakers Network is to support and meet the needs of the continuing medical education (CME) community by providing a non-commercial speakers bureau offering quality, unbiased speakers, who can address the professional practice gaps of its learners via CME lectures and meetings.

April 15, 2010

Dear Medical Education Professional,

Medical Education Speakers Network (MESN) is pleased to present the 2010 / 2011 East Coast Directory of Speakers. This year's updated directory provides a sampling of East Coast speakers, along with their topics, who can provide lectures to meet your program's educational needs.

MESN is an independent speaker's bureau for CME Professionals that was designed in 1996 to help meet your medical education needs by offering quality, unbiased speakers for your educational events. MESN is NOT a pharmaceutical or commercial company. Our goal is to provide professional speakers and information to assist you in coordinating a successful program that meets your educational requirements and practice gaps while complying with CME guidelines. In addition to providing speakers you can afford, you can also request assistance with obtaining educational grants for your organization to help support a variety of topics.

Keep in mind that our network is not limited to the speakers listed in this or any MESN directory. The 2010 / 2011 East Coast Directory of Speakers is a representative sample of our extensive database of approximately 14,000 speakers who cover a wide variety of topics. If you do not find a topic or speaker of interest, please contact our office and we will be happy to prepare a customized list to match your specific requirements.

Try our service and see why a large number of hospitals and other accredited organizations choose Medical Education Speakers Network to book speakers while complying with today's CME standards.

To request a speaker, assistance with educational grants or to obtain additional information about our service, please choose the most convenient option and a representative will assist you:

Phone: (714) 505-4777 Fax: (714) 505-7698 Email: info@speakersnetwork.com Website: www.speakersnetwork.com

We look forward to assisting with your next event.

Sincerely,

Maria Anderson
